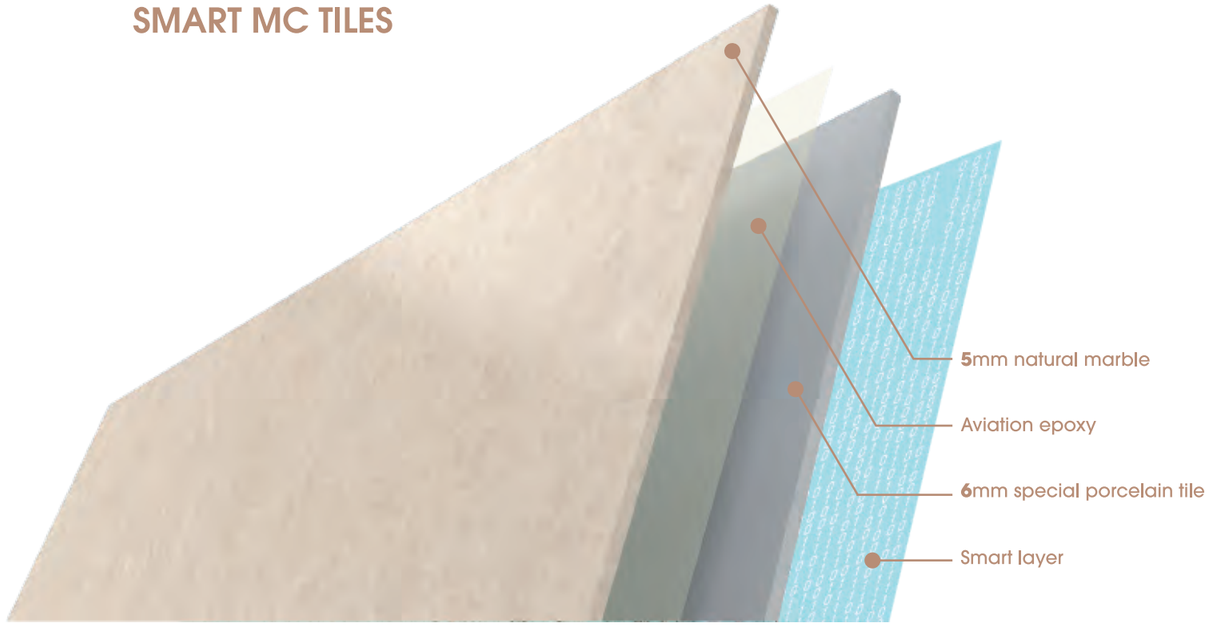
MARMOCER 2.0

SMART MC TILES



MARMOCER
technology in marble

MARMOCER, established in 1999, is a leader in the modern stone industry, focused on providing customers with eco-friendly, natural marble tiles through re-creation & innovation.

What Makes Us Unique:
·Pioneer in the production process of natural marble tiles with a reinforced Porcelain body, thus creating a new innovative industry;
·Works with the government to establish and maintain the industrial standards for natural marble tile;
·Built up the world's first stone library, an original concept. Literally a library of Turkish quarries where buyers and quarry owners can locate each other easily.
·Owns 20 quarries throughout Turkey;
·Produces products from the best quarries throughout the world. Marmocer selects high quality marble from Italy, Spain, Greece, Iran, Indonesia, to name a few.
·Designed and built the first and only fully-automated production facility of this new process.
·Obtained 28 patents (including 3 pending) and 122 copyrights (including 20 pending);

The entire team of Marmocer takes great pride in our ability to provide the world with eco-friendly, natural marble tiles. We strive to provide more customers access to marble spatial solutions – giving our customers access to environmental friendly alternatives to benefit the planet.

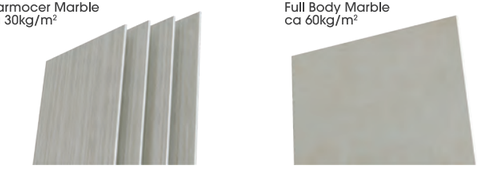
MARMOCER technology in marble

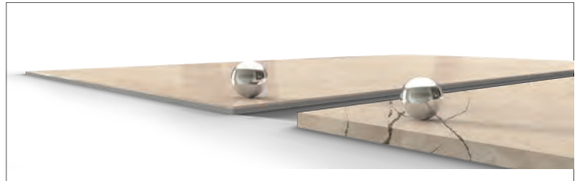
marmocer USA technology in marble

MARMOCER MARBLE
VS
TRADITIONAL STONE MARBLE

Lightweight	X	X	Heavy
More Durable	X	X	Easy to Crack
High Gloss	X	X	10-15% Breakage
Non-porous	X	X	Hard to maintain



Less is More
Marmocer marble weighs only 50% of full body marble.
Much less impact than full body marble in the event of substrate settling or movement.



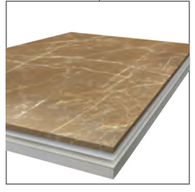
Saving is Earning
Full body marble allows 10-15% breakage during transport and installation.
Marmocer marble breakage is only 3%, reinforcing its durability, with 200-300% as strong as full body marble.

Consistent shade range
Compared to a full block of full body marble, Marmocer tile will yield three times as many square meters.
It enhances the usage of natural marble and presents better color consistency.
Even better, it helps less consumption of natural stone.

DEVELOPMENT HISTORY

1999 — Started to explore The world of Natural stones

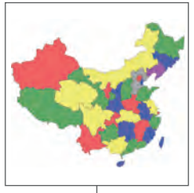
2003 — U+ marble tile Technology approved By smith-emery lab & aidico



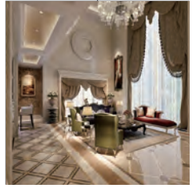
2004 — Production of marmocer Marble began and brand Registered

2008 — World top 500 stone Company & china top 10 marble tile stone Company

2011 — Top 10 china stone Company



2012 — Campaign ‘redefine’ Set off



2013 — Turkey stone library Established.

2014 — World’s only automation For marble tile put Into use.

2015 — Created a new o2o Business model
