The benefits of Ceramic Tiles

Porcelain tiles: a safe choice

HYGIENIC
Igienico

The ideal material for bathroom surfaces: the surfaces are easy to sanitize thanks to its compact nature and chemical-physical stability.

Un materiale ideale per le superfici bagno: le superfici sono facilmente igienizzabili grazie alla sua compattezza e la sua stabilità chimico-fisica.

RESISTANT
Resistente

The superior surface hardness makes it especially resistant to scratches and everyday wear.

L'elevata durezza superficiale lo rende particolarmente resistente ai graffi ed all'usura quotidiana.

EASY TO CLEAN
Facile da pulire

Waterproof properties teamed with a compact nature make this material resistant to chemicals and therefore easy to clean.

L'impermeabilità assieme alla compattezza lo rende un materiale resistente agli agenti chimici e di conseguenza facilmente pulibile.

MATCHABLE
Coordinabile

The perfect matching with Atlas Concorde surfaces harmonizes every setting.

La perfetta abbinabilità con le superfici Atlas Concorde dona armonia a ogni ambiente.

THE BENEFITS OF CERAMIC TILES

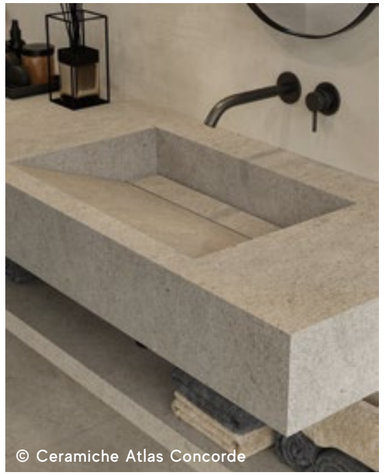
The combination of elegance and functionality.



Porcelain sinks and shelves are elements designed down to the smallest detail to create complete bathroom settings in terms of design and aesthetics. These proposals have a high stylistic and performance value and were designed to be matched with Atlas Concorde ceramic surfaces, ensuring a perfect combination of elegance and practicality.

Lavabi e mensole in gres porcellanato, elementi studiati nei minimi dettagli per realizzare ambienti bagno all'insegna della massima completezza progettuale ed estetica. Proposte dall'alto valore stilistico e prestazionale che nascono per coesistere, in abbinamento alle superfici ceramiche di Atlas Concorde, assicurando un perfetto connubio tra eleganza e praticità.

Lavabos et étagères en grès cérame, éléments étudiés dans les moindres détails pour réaliser des salles de bains sous le signe d'une exhaustivité conceptuelle et esthétique maximale. Des propositions à forte valeur stylistique et hautes performances créées pour cohabiter, en assortiment avec les surfaces céramiques d'Atlas Concorde, afin de garantir une union parfaite entre élégance et praticité.

Waschbecken und Ablagen aus Feinsteinzeug, bis ins kleinste Detail studierte Elemente für ein Badezimmer, das in Bezug auf Design und Ästhetik so vollständig wie möglich ist. Stilvolle und funktionale Vorschläge, die in Kombination mit den keramischen Oberflächen von Atlas Concorde eine perfekte Kombination von Eleganz und Zweckmäßigkeit gewährleisten.

Lavabos y estantes de porcelánico, elementos pensados hasta el más mínimo detalle para crear ambientes de baño con un diseño y una estética perfectos. Propuestas de alto valor estilístico y funcional diseñadas para convivir con las superficies cerámicas de Atlas Concorde, asegurando una combinación perfecta de elegancia y practicidad.

Умывальники и полки из керамогранита, а также продуманные до мельчайших деталей элементы придают интерьеру ванной комнаты максимальную дизайнерскую и эстетическую завершенность. Предложения с высокой стилистической и функциональной ценностью, созданные для гармоничного сосуществования, в сочетании с керамическими поверхностями Atlas Concorde являют собой идеальное сочетание элегантности и практичности.

THE BENEFITS OF CERAMIC TILES

Synthesis of technical performance and versatility.

Thanks to the wide availability of sizes, colors and finishes, the Mastertop element opens the way for the introduction of porcelain tops that combine excellent technical performance with extreme versatility. This offers a furnishing proposal using its refined design and project functionality.

Grazie all'ampia disponibilità di dimensioni, colori e finiture, l'elemento Mastertop apre la strada alla realizzazione di piani in gres porcellanato in grado di coniugare eccellenti prestazioni tecniche e una pronunciata versatilità. Una proposta di arredo che trova un punto di sintesi tra ricercatezza del design e funzionalità progettuale.

Grâce à la grande disponibilité de dimensions, couleurs et finitions, l'élément Mastertop ouvre la voie à la réalisation de plans en grès cérame capables d'associer d'excellentes performances techniques et une polyvalence marquée. Une proposition d'ameublement qui définit un point de synthèse entre raffinement du design et fonctionnalité de conception.

Dank der großen Auswahl an Formaten, Farben und Ausführungen ermöglicht das Mastertop-Element die Realisierung von Feinsteinzeugplatten, die hervorragende technische Leistungen mit einer ausgeprägten Vielseitigkeit verbinden. Ein Einrichtungsvorschlag, der eine Synthese zwischen Designveredelung und Projektfunktionalität findet.

Gracias a la amplia disponibilidad de tamaños, colores y acabados, el elemento Mastertop abre el camino a la creación de encimeras de porcelánico capaces de combinar excelentes prestaciones técnicas y una fuerte versatilidad. Una propuesta decorativa que brinda un punto de encuentro entre estética y funcionalidad del diseño.

Благодаря широкому ассортименту размеров, цветов и отделки Mastertop открывает возможности создавать столешницы из керамогранита, сочетающие в себе превосходные технические характеристики и абсолютную универсальность. Предложение по меблировке, которое объединяет изысканность дизайна и проектную функциональность.

THE BENEFITS OF CERAMIC TILES

Porcelain tile values: aesthetics, resistance and hygiene.

© Ceramiche Atlas Concorde

© Ceramiche Atlas Concorde

In all the sink elements of the Contract line, the availability of the accessible basin makes it possible to combine aesthetics with ease of cleaning. Hygienic and extremely hard-wearing, the basins focus on the unrivalled qualities of porcelain to give resistance and durability to bathroom furnishings.

In tutti gli elementi lavabo della linea Contract, la disponibilità della vasca ispezionabile permette di coniugare estetica con facilità di pulizia. Igieniche, estremamente resistenti, le vasche mettono al centro le qualità impareggiabili del gres porcellanato per dare forza e durevolezza all'arredo bagno.

Dans tous les éléments lavabo de la ligne Contract, la disponibilité du fond de cuve inspectable permet d'associer esthétique et facilité de nettoyage. Hygiéniques et extrêmement résistantes, les cuves mettent en valeur les qualités incomparables du grès cérame pour donner de la force et de la durabilité à l'ameublement de salle de bains.

Bei allen Waschtisch-Elementen der Linie Contract ermöglicht die Verfügbarkeit des inspizierbaren Beckens die Kombination von Ästhetik und einfacher Reinigung. Die hygienischen und extrem widerstandsfähigen Becken setzen auf die unübertroffenen Qualitäten des Feinsteinzeugs, damit das Bad auf Dauer schön bleibt.

Todos los lavabos de la línea Contract cuentan con un seno inspeccionable, permitiendo combinar estética con facilidad de limpieza. Higiénicos y extremadamente resistentes, los senos aprovechan las ventajas inigualables del porcelánico para dar solidez y durabilidad a los muebles de baño.

Во всех вариантах раковин линейки Contract наличие чаши с доступом для обслуживания позволяет сочетать эстетичность с простотой чистки. Гигиеничные, чрезвычайно прочные чаши наглядно демонстрируют непревзойденные качества керамогранита, делающего мебель для ванных комнат прочной и долговечной.

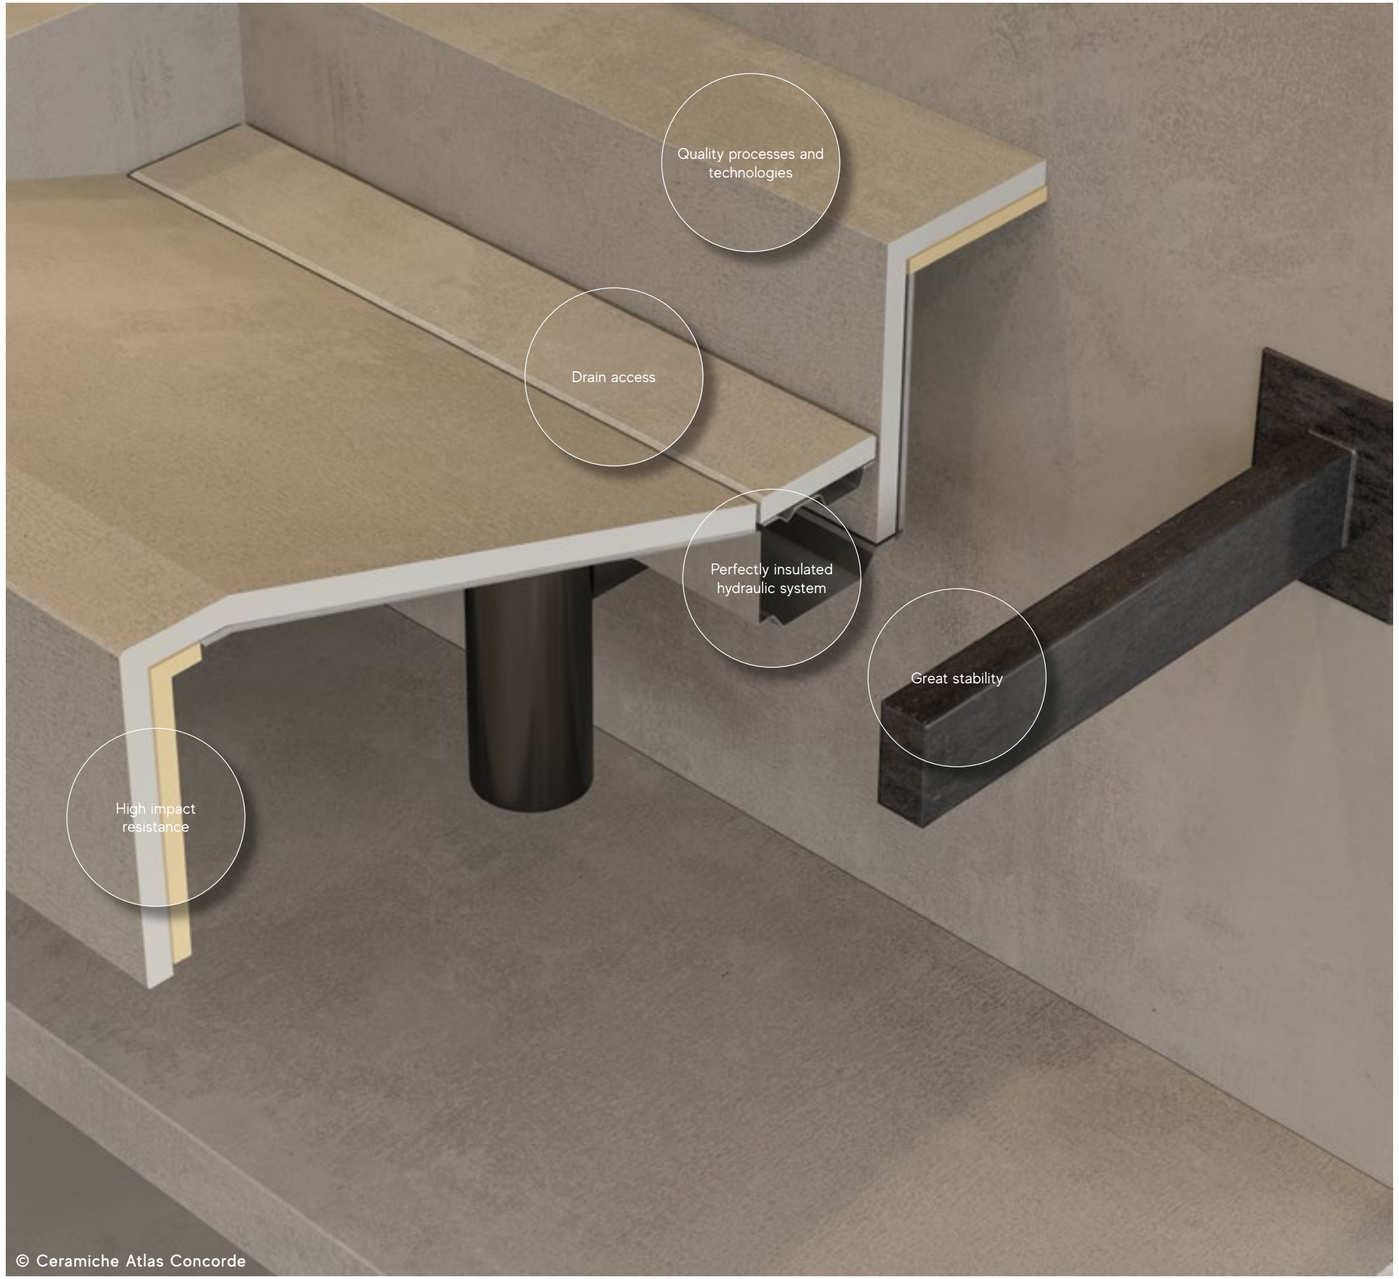
67 TECHNICAL FEATURES
69 PRODUCT RANGE
75 LOOKS, COLORS AND FINISHES
81 CLEANING AND MAINTENANCE



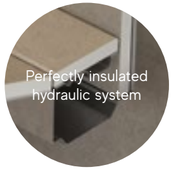
Technical features

Quality processes and technologies: the use of the most advanced manufacturing techniques, the best materials and stringent quality testing protocols allow Atlas Concorde products to achieve very high aesthetic and functional performance.

Processi e tecnologie di qualità: l'utilizzo delle più avanzate tecniche di lavorazione, dei migliori materiali nonché di stringenti protocolli di qualità permettono di raggiungere un'elevatissima performance estetica e funzionale.

Drain access: rotating the swinging panel makes it possible to access the basin, allowing any remaining dirt to be easily removed.

Vasca ispezionabile: attraverso la rotazione della basculante è possibile ispezionare la vasca, consentendo di rimuovere con facilità ogni eventuale residuo di sporco.



Perfectly insulated hydraulic system: the one-piece stainless steel basin prevents water infiltration and ensures perfect hydraulic insulation of the object over time.

Sistema idraulico perfettamente isolato: la vasca monoblocco in acciaio inossidabile evita le infiltrazioni di acqua e garantisce nel tempo il perfetto isolamento idraulico dell'oggetto.

High impact resistance: the composite structure has been designed and tested to ensure high impact resistance.

Alta resistenza agli urti: la struttura composita è stata progettata e testata in modo da garantire una grande resistenza agli urti.

Great stability: the fixing system consisting of specially designed stainless-steel brackets ensures high stability and structural sturdiness.

Grande stabilità: il sistema di fissaggio costituito da delle staffe in metallo appositamente studiate ne garantiscono un'elevata stabilità e solidità strutturale.

CLEANING AND MAINTENANCE
SUSTAINABILITY
THE BENEFITS OF CERAMIC TILES

Cleaning and maintenance

SANITIZING
Porcein tiles surfaces are extremely easy to sanitize, owing to the physical and mechanical features of this material. Indeed, since they are produced at extremely high temperatures, they prove entirely poreless, which prevents mold, mildew and bacteria from spreading. This means sanitizing products or products with a specific concentration of chemicals capable of eradicating germs and bacteria from surfaces can easily be used, for optimum efficiency and without worrying about damaging the material itself.

ROUTINE CLEANING
For routine cleaning, simply use a damp sponge or a microfiber cloth with hot water and ordinary neutral detergent* then wipe dry with a soft cloth. To remove dirt built up in the corners, we recommend you rub with a nonabrasive soft bristle brush. Avoid using:
1. Products with waxing, restoring, polishing, brightening properties;
2. Products containing hydrofluoric acid and its derivatives;
3. Metal wire pads (iron and steel pads) or excessively abrasive pads.

CAUTION: Porcelain tiles do not require the application of waxes or detergents with polishing additives, even when the surface is glossy/lapped.

*such as **Clean Universal** made by **Faber Chimica** or **Fila Clean&Shine** for the Italian market - **Fila Cleanall** for the **US** market - **Fila Brio for all other markets.**

EXTRAORDINARY CLEANING
In the event of tough stains, which cannot be removed during routine cleaning operations, we suggest the use of alkaline detergents* for coffee, fruit juice, wine, ink stains and the like, acidic detergents**
in the event of limescale residue (or rust), use specific detergents to remove silicone sealant residue***

*such as **Clean Degreaser - Deep Degreaser** made by **Faber Chimica** or **Fila Powerclean** for the Italian market - **Fila Hobby** for other markets.
such as **Clean Limescale - Tile Cleaner made by **Faber Chimica** or **Fila Deepclean** for the Italian market - **Fila Via Bagno** for other markets.
***such as **Epoxy Cleaner** made by **Faber Chimica** or **Fila Zerosil.**

STEEL SURFACES
Stainless steel is an extremely strong material and is not subject to the corrosive action of oxidation. However, specific products should be used for cleaning it.
In addition, to avoid damaging the surface, do not use:
1. sponges or scourers that could cause irreversible scratches and abrasions;
2. aggressive chemicals;
3. cleaning products based on ammonia, bleach or chlorine.

IGIENIZZAZIONE
Le superfici in gres porcellanato sono estremamente facili da igienizzare, grazie alle caratteristiche fisico-meccaniche di questo materiale. Infatti, essendo prodotta ad altissime temperature, risulta totalmente priva di pori, fatto che impedisce a muffe e batteri di proliferare. È possibile utilizzare pertanto senza problemi prodotti igienizzanti ossia con una determinata concentrazione di sostanze in grado di eliminare germi e batteri dalle superfici, con la massima efficacia e senza temere di rovinare il materiale stesso.

PULIZIA ORDINARIA
Per la pulizia quotidiana è sufficiente utilizzare una spugna inumidita o un panno in microfibra con acqua calda e un comune detergente neutro* asciugando con un panno morbido. Per la rimozione di sporco accumulatosi negli angoli si suggerisce di strofinare con uno spazzolino con setole morbide non abrasive.
Evitare l'utilizzo di:
1. Prodotti con caratteristiche ceranti, ravvivanti, lucidanti, brillantanti;
2. Prodotti che contengono acido fluoridrico e suoi derivati;
3. Pagliette di metallo (spugnette di ferro e acciaio) o eccessivamente abrasive.

ATTENZIONE: Il gres porcellanato non richiede l'applicazione di cere o di detergenti con additivi lucidanti anche quando ha una superficie lucida/lappata.

*tipo **Clean Universal** della **Faber Chimica** oppure **Fila Clean&Shine per mercato IT - Fila Cleanall** per mercato **USA - Fila Brio per tutti gli altri mercati.**
PULIZIA STRAORDINARIA
Nel caso di macchie ostinate, non rimovibili con la pulizia ordinaria, si suggerisce di utilizzare detergenti a base alcalina* per caffè, succhi di frutta, vino, inchiostro, ed etc...
detergenti a base acida** nel caso di residui di calcare (o ruggine) utilizzare detergenti specifici per la rimozione di residui di sigillanti siliconici***

*tipo **Clean Degreaser - Deep Degreaser** della **Faber Chimica** oppure **Fila Powerclean per mercato IT - Fila Hobby per gli altri mercati.**
tipo **Clean Limescale - Tile Cleaner della **Faber Chimica** oppure **Fila Deepclean per il mercato IT - Fila Via Bagno per gli altri mercati.**
***tipo **Epoxy Cleaner** della **Faber Chimica** oppure **Fila Zerosil.**

SUPERFICI IN ACCIAIO
L'acciaio inox è un materiale estremamente resistente e non è soggetto all'azione corrosiva dell'ossidazione. Tuttavia per la pulizia è opportuno adoperare prodotti specifici.
Inoltre per evitare il danneggiamento della superficie non utilizzare:
1. spugne o pagliette metalliche che potrebbero generare graffi ed abrasioni irreversibili;
2. sostanze chimiche aggressive;
3. prodotti per la pulizia a base di ammoniaca, candeggina o cloro.

NETTOYAGE
Les surfaces en grès sont très faciles à nettoyer grâce aux caractéristiques physiques et mécaniques de ce matériau. En effet, étant produit à des températures très élevées, il n'a aucun pore ce qui empêche la prolifération des moisissures et des bactéries. Il est donc possible d'utiliser sans problème des produits de nettoyage, ou avec une concentration de substances déterminée, capables d'éliminer des germes et des bactéries des surfaces, avec une efficacité maximale et sans craindre de dégrader le matériau.

NETTOYAGE ORDINAIRE
Pour le nettoyage quotidien, il suffit d'utiliser une éponge humide ou un chiffon en microfibre avec de l'eau chaude et un détergent neutre* courant puis d'essuyer avec un chiffon doux. Pour éliminer la saleté accumulée dans les coins, il est conseillé de frotter avec une petite brosse à poils doux non abrasifs. Éviter d'utiliser :
1. Produits comme de la cire ou permettant d'éclaircir ou de faire briller le support ;
2. Produits qui contiennent de l'acide fluorhydrique et ses dérivés ;
3. Pailles métalliques (pailles et fer et d'acier) ou excessivement abrasives.

ATTENTION : Le grès cérame ne nécessite pas l'application de cires ou de détergents avec des additifs permettant de faire briller même quand sa surface est brillante/demi-polie.

*type **Clean Universal** de **Faber Chimica** ou **Fila Clean&Shine** pour le marché IT - **Fila Cleanall** pour le marché **USA - Fila Brio** pour tous les autres marchés.

NETTOYAGE EXTRAORDINAIRE
En cas de taches tenaces, impossibles à éliminer avec un nettoyage ordinaire, il est conseillé d'utiliser des détergents alcalins* pour le café, les jus de fruit, le vin, l'encre, etc.,
des détergents acides** dans le cas de résidus de calcaire (ou de rouille) et d'utiliser des détergents spécifiques pour l'élimination de résidus de mastic à base de silicone***.

*type **Clean Degreaser - Deep Degreaser** de **Faber Chimica** ou **Fila Powerclean** pour le marché **IT - Fila Hobby** pour les autres marchés.
type **Clean Limescale - Tile Cleaner de **Faber Chimica** ou **Fila Deepclean** pour le marché **IT - Fila Via BAGNO** pour les autres marchés.
***type **Epoxy Cleaner** de **Faber Chimica** ou **Fila Zerosil**.

SURFACES EN ACIER
L'acier inoxydable est un matériau extrêmement résistant et n'est pas soumis à l'action corrosive de l'oxydation. Toutefois, pour son nettoyage, il faut utiliser des produits spécifiques.
En outre, afin d'éviter l'endommagement de la surface, ne pas utiliser de :
1. éponges ou éponges métalliques, qui pourraient créer des rayures et abrasions irréversibles ;
2. substances chimiques agressives ;
3. produits d'entretien à base d'ammoniac, javel ou chlore.

HYGIENISIERUNG
Feinsteinzeugoberflächen sind dank der physikalisch-mechanischen Eigenschaften dieses Materials extrem leicht zu desinfizieren. Da es bei sehr hohen Temperaturen hergestellt wird, ist es völlig porenfrei, was die Vermehrung von Schimmel und Bakterien verhindert. Aus diesem Grunde können auch spezifische Reinigungsmittel mit hygienisierenden Substanzen verwendet werden, die in der Lage sind, Keime und Bakterien von Oberflächen zu beseitigen, und zwar mit maximaler Wirksamkeit und ohne dass die Gefahr einer Beschädigung des Materials besteht.

REGELMÄSSIGE REINIGUNG
Für die tägliche Reinigung einfach einen feuchten Schwamm oder ein Mikrofasertuch mit warmem Wasser und einem handelsüblichen neutralen Reinigungsmittel* verwenden und mit einem weichen Tuch abtrocknen. Zur Entfernung von Schmutz, der sich in den Ecken angesammelt hat, wird empfohlen, mit einer nicht scheuernden Bürste mit weichen Borsten zu reiben. Absolut zu vermeiden sind:
1. Produkte mit Bodenwachs, Glanzmitteln, Poliermitteln usw.
2. Produkte, die Fluorwasserstoffsäure und Derivate enthalten.
3. Stahlwolle o.ä. oder zu stark scheuernde Schwämme.

ACHTUNG: Feinsteinzeug erfordert keine Anwendung von Wachsen oder Reinigungsmitteln mit Polierzusätzen, auch wenn es eine polierte/geläppte Oberfläche hat.

*Typ **Clean Universal** von **Faber Chimica** oder **Fila Clean&Shine** für den italienischen Markt - **Fila Cleanall** für den amerikanischen Markt - **Fila Brio** für alle anderen Märkte.

AUSSERGEWÖHNLICHE REINIGUNG
Bei hartnäckigen Flecken, die sich durch normale Reinigung nicht entfernen lassen, wird die Verwendung von Reinigungsmitteln* auf alkalischer Basis für Kaffee, Fruchtsäfte, Wein, Tinte usw. empfohlen, säurehaltige Reinigungsmittel** bei Kalk- (oder Rost-) Rückständen, verwenden Sie spezielle Reinigungsmittel für die Entfernung von Silikondichtungsrückständen***

*Typ **Clean Degreaser - Deep Degreaser** von **Faber Chimica** oder **Fila Powerclean** für den italienischen Markt - **Fila Hobby** für alle anderen Märkte.
Typ **Clean Limescale - Tile Cleaner von **Faber Chimica** oder **Fila Deepclean** für den italienischen Markt - **Fila Via Bagno** für alle anderen Märkte.
*Typ **Epoxy Cleaner** von **Faber Chimica** oder **Fila Zerosil**.

STAHLOBERFLÄCHEN
Edelstahl ist ein extrem widerständiges Material das keine korrosive Wirkung von Oxidation scheut. Für die Reinigung sollten jedoch spezielle Produkte verwendet werden.
Damit die Oberfläche nicht beschädigt wird, sollte außerdem der Einsatz folgender Materialien vermieden werden:
1. Metallschwämme oder -pads, die irreversible Kratzer und Abschürfungen verursachen können;
2. Aggressive Chemikalien;
3. Reinigungsmittel auf der Basis von Ammoniak, Bleichmittel oder Chlor.

HIGIENIZACIÓN
Las superficies de gres son extremadamente fáciles de higienizar, gracias a las características físico-mecánicas de este material. De hecho, al producirse a temperaturas muy elevadas, está totalmente libre de poros, lo que evita la proliferación de moho y bacterias. Por lo tanto, es posible utilizar sin problemas productos higienizantes o con una determinada concentración de sustancias capaces de eliminar gérmenes y bacterias de las superficies, con la máxima eficacia y sin miedo a dañar el propio material.

LIMPIEZA HABITUAL
Para la limpieza diaria, simplemente use una esponja húmeda o un paño de microfibra con agua caliente y un detergente neutro común*, y seque con un paño suave. Para eliminar la suciedad acumulada en las esquinas, se recomienda frotar con un cepillo de cerdas suaves no abrasivas. Evite el uso de:
1. Productos con características de encerado, reavivación, pulido y abrillantado;
2. Productos que contienen ácido fluorhídrico y sus derivados;
3. Estropajos metálicos (de hierro y acero) o excesivamente abrasivos.

ATENCIÓN: El gres porcelánico no requiere la aplicación de ceras o detergentes con aditivos de pulido incluso cuando tiene una superficie pulida/lapeada.

*tipo **Clean Universal** de **Faber Chimica** o **Fila Clean&Shine** para el mercado Italia - **Fila Cleanall** para el mercado **Estados Unidos - Fila Brio** para todos los demás mercados.

LIMPIEZA EXTRAORDINARIA
En caso de manchas rebeldes de café, zumos de fruta, vino, tinta, etc. que no se puedan eliminar con la limpieza habitual, se recomienda utilizar detergentes de base alcalina*
detergentes de base ácida** en el caso de residuos de cal (u óxido) utilice detergentes específicos para eliminar los residuos de selladores de silicona***

*tipo **Clean Degreaser - Deep Degreaser** de **Faber Chimica** o **Fila Powerclean** para el mercado Italia - **Fila Hobby** para los demás mercados.
tipo **Clean Limescale - Tile Cleaner de **Faber Chimica** o **Fila Deepclean** para el mercado Italia - **Fila Via Bagno** para los demás mercados.
***tipo **Epoxy Cleaner** de **Faber Chimica** o **Fila Zerosil**.

SUPERFICIES DE ACERO
El acero inoxidable es un material extremadamente resistente y no está sujeto a la acción corrosiva de la oxidación. No obstante, para la limpieza se recomienda utilizar productos especiales.
Además, para evitar dañar la superficie, no hay que usar:
1. estropajos ni esponjas de acero que podrían producir arañazos y abrasiones irreversibles;
2. productos químicos agresivos;
3. productos de limpieza a base de amoníaco, lejía o cloro.

THE BENEFITS OF CERAMIC TILES

САНИТАРНАЯ ОБРАБОТКА
Плитку из керамогранита очень легко дезинфицировать благодаря физико-механическим характеристикам материала. Очень высокая температура производства плитки из керамогранита позволяет добиться полного отсутствия пор, благодаря чему на поверхности плитки не размножаются бактерии и плесень. Данная особенность плитки позволяет с максимальной эффективностью и без опасения повредить материал использовать дезинфицирующие средства или продукты с определенной концентрацией активных веществ, способных уничтожать микробы и бактерии на поверхностях.

ЕЖЕДНЕВНАЯ ОЧИСТКА
Для ежедневной очистки достаточно использовать влажную губку или салфетку из микрофибры, смоченную теплой водой и обычным нейтральным моющим средством*. После очищения плитку следует насухо вытереть мягкой тряпкой. Чтобы удалить скопившуюся в углах грязь, рекомендуется протирать плитку щеткой с мягкой неабразивной щетиной. Запрещается использовать:
1. Продукты, содержащие воски или парафины, и придающие поверхности хороший внешний вид и блеск.
2. Продукты, содержащие плавиковую кислоту и ее соединения.
3. Металлические мочалки (стальные губки) или другие абразивные материалы.

ВНИМАНИЕ! Плитка из керамогранита не требует применения воска или моющих средств с полировальными добавками, даже если она имеет полированную/лаппатированную поверхность.

*например, «**Clean Universal**» от производителя **Faber Chimica**, «**Fila Clean&Shine**» для итальянского рынка, «**Fila Cleanall**» для рынка **США** или «**Fila BRIO**» для всех остальных рынков.

УСТРАНЕНИЕ СТОЙКИХ ЗАГРЯЗНЕНИЙ
В случае возникновения стойких пятен, которые невозможно удалить в процессе ежедневной очистки, рекомендуется использовать щелочные моющие средства*. Для устранения пятен кофе, фруктовых соков, вина, чернил и т. д.
рекомендуется использовать моющие средства на кислотной основе**. Для устранения известкового налета (или ржавчины) рекомендуется использовать специальные моющие средства для удаления остатков силиконовых герметиков***

*например, «**Clean Degreaser - Deep Degreaser**» от производителя **Faber Chimica**, «**Fila Powerclean**» для итальянского рынка, «**Fila Hobby**» для других рынков.
например, «Clean Limescale - Tile Cleaner**» от производителя **Faber Chimica**, «**Fila Deepclean**» для итальянского рынка, «**Fila Via Bagno**» для других рынков.
***например, «**Epoxy Cleaner**» от производителя **Faber Chimica** или «**Fila Zerosil**».

СТАЛЬНЫЕ ПОВЕРХНОСТИ
Нержавеющая сталь является чрезвычайно прочным материалом и не подвержена коррозионному воздействию окисления. Однако для ее очистки следует использовать специальные средства. Кроме того, во избежание повреждения поверхности не используйте:
1. металлические губки или мочалки, которые могут оставить навсегда царапины и потертости;
2. агрессивные химические вещества;
3. чистящие средства, содержащие аммиак, отбеливатель или хлор.

Note

CAUTION
Avoid accidental shocks that could result in chipping or irreversible damage. In the event of breakage, check that the structural parts are not damaged and, if necessary, discard the item.
Avoid any improper use of the items and their components. Some removable parts could be used as blunt objects.
Be careful: sharp edges and possible razor-sharp surfaces.

ATTENZIONE
Evitare urti accidentali che potrebbero provocare sbeccature o lesioni non ripristinabili. In presenza di rotture verificare che le parti strutturali non siano compromesse e nel caso mettere fuori utilizzo l'oggetto.
Evitare qualsiasi uso improprio degli articoli e dei loro componenti. Alcune parti removibili potrebbero essere utilizzate come oggetti contundenti.
Prestare attenzione: spigoli acuminati e possibile presenza di superfici taglienti.

ATTENTION
Éviter les chocs accidentels qui pourraient provoquer des ébréchures ou des lésions impossibles à réparer. En cas de ruptures, vérifier que les parties structurelles ne soient pas compromises et si c'est le cas, mettre l'objet hors d'usage.
Éviter tout usage impropre des articles et de leurs composants. Certaines parties amovibles pourraient être utilisées comme des objets susceptibles de blesser. Faire attention : arêtes vives et présence possible de surfaces coupantes.

ACHTUNG
Stöße sind zu vermeiden, da sie zu Absplitterungen oder Schäden führen könnten, die nicht reparierbar sind. Im Falle von Schäden muss sichergestellt werden, dass die Strukturteile keine Schäden erlitten haben. Ansonsten sollte der Gegenstand nicht mehr genutzt werden.
Jede unsachgemäße Verwendung der Artikel und ihrer Bestandteile ist zu vermeiden. Einige abnehmbare Teile könnten bei unsachgemäßem Gebrauch Verletzungen hervorrufen. Immer vorsichtig sein und auf scharfe Kanten und Teile achten.

ATENCIÓN
Evite impactos accidentales que puedan causar mellas o lesiones irreparables. Si se observan roturas, compruebe que las partes estructurales no estén afectadas y, si es necesario, deje de utilizar el objeto.
Evite cualquier uso indebido de los artículos y sus componentes. Algunas partes extraíbles podrían usarse como objetos contundentes.
Cuidado: podría haber bordes puntiagudos y superficies afiladas.

ВНИМАНИЕ
Избегайте случайных ударов, которые могут вызвать сколы или необратимые повреждения. В случае поломки проверьте, не повреждены ли конструктивные элементы, и, если необходимо, выведите изделие из эксплуатации.
Избегайте любого ненадлежащего использования изделий и их компонентов. Некоторые съемные детали могут быть использованы в качестве тупых предметов.
Будьте осторожны: острые края и возможное наличие режущих кромок.

Energy efficiency

- 100% autonomous on energy
- Hot air heat recovery from kilns and cooling water
- -40% — 40% savings on natural gas
- -50% — 100% LED lighting 50% ANNUAL SAVINGS in electricity consumption

Waste management

- 100% recycled scraps
- 99% — 99% of waste sent for recovery and 25% waste reduction in the last two years
- 100% recycled industrial water and 27% reduction in water consumption in the last two years

Environment and health first

- Cardboard and other packaging: 100% recycled material
- -60% CO_2 — MAV Automatic Vertical Warehouse: 60% CO2 reduction
- Complete air filtration
- Absence of carcinogenic substances in products

Our certifications:

ISO 17889-1 · LEED · ISO 14021 · EPD · PEF · FDES · hpdc MEMBER

An ecological transition is among the company's industrial priorities. Our plants comply with the most stringent international regulations – fully automated and low-impact – as they are equipped with energy cogeneration systems. A constant commitment to the total reduction of waste and emissions completes the picture of a company oriented towards maximum environmental sustainability.

La transizione ecologica è tra le priorità industriali dell'azienda. I nostri impianti sono conformi alle più stringenti normative internazionali, completamente automatizzati e a basso impatto, in quanto dotati di sistemi di cogenerazione energetica. Il costante impegno per la totale riduzione degli sprechi e delle emissioni completano il quadro di un'azienda orientata alla massima sostenibilità ambientale.

La transition écologique est une des priorités industrielles de l'entreprise. Nos installations sont conformes aux réglementations internationales les plus sévères, entièrement automatisées et à faible impact, car équipés de systèmes de cogénération énergétique. L'engagement constant pour la réduction totale du gaspillage et des émissions complète le tableau d'une entreprise engagée pour une meilleure durabilité environnementale.

Der ökologische Wandel gehört zu den Prioritäten der industriellen Strategie des Unternehmens. Unsere Anlagen entsprechen den strengsten internationalen Richtlinien; sie arbeiten vollautomatisch und umweltschonend, denn sie sind mit Kraft-Wärme-Kopplungssystemen ausgerüstet. Ein weiterer Aspekt dieses Unternehmens, das sich ganz der Erreichung maximaler ökologischer Nachhaltigkeit verschrieben hat, ist sein kontinuierliches Engagement für die völlige Eliminierung von Verschwendung und Emissionen.

La transición ecológica está entre las prioridades industriales de la empresa. Nuestras plantas cumplen las normas internacionales más estrictas, totalmente automatizadas y de bajo impacto, ya que están equipadas con sistemas de cogeneración energética. Los esfuerzos constantes por reducir completamente los residuos y las emisiones completan la imagen de una empresa centrada en la máxima sostenibilidad medioambiental.

Экологический переход – один из основных технологических приоритетов компании. Наши производственные процессы отвечают требованиям строжайших международных стандартов, автоматизированы, оказывают минимальное воздействие на окружающую среду, а кроме того, на заводе работает собственная когенерационная установка. А еще мы принимаем меры по сокращению отходов и выбросов, что является еще одним свидетельством ориентации на экологическую устойчивость.
